

Why Water Bottles?

Stockamp is proud to give back to the community and environment. We can continue this tradition by “going green.” By giving up bottled water at company conferences we can help reduce the negative impact of plastics on the environment. Enjoy this bottle here at the conference, at home, at work and at the gym. Together we can all make a difference!

Got Water?
Go Green.

- Stockamp used 2,900 water bottles at the last two conferences.
- The United States is the largest consumer of bottled water, drinking 28.3 billion gallons of bottled water.
- This requires more than 1.5 million barrels of oil annually which could fuel 100,000 cars for a year.
